Harford County Public Schools is focused on excellence in the classroom, school, and management of the school system. This on-going commitment is demonstrated by a variety of measures of achievement and efficiency.

The Board of Education will continue to integrate performance measures within specific program budgets, especially in light of the requirement for a State approved Master Plan as a part of the Bridge to Excellence state funding initiative. Standards are measures of performance against which yearly results are compared. Standards help to:

- Examine critical aspects of instructional programs.
- Ensure that all students receive quality instruction.
- Hold educators accountable for quality instruction.
- Guide efforts toward school improvement.

Historically, the challenge in designing performance measures for a school system, particularly those measures that are applied to specific programs, has been to develop the link between funding a program and generating an output or outcome. While the community can measure performance of a school system based on easily quantifiable and macro indicators, such as standardized test scores, graduation rates and pass/fail indicators, it often becomes difficult to attribute the resources directed to one program with the effect on a specific measure. Because of the complex relationships that exist among programs and between the programs and resources provided throughout the system, the relationship between program and result is very difficult to determine.

Performance measures for school systems tend to emphasize more macro-level outputs or outcomes. These would be measures that are not easily traceable to the outcome of one particular program. Typically, the aggregate of programs taken together affect an outcome. Student achievement, for example, may be measured by standardized tests, however, these results may represent the culmination of many programs and the impact these resources have on the child. Student achievement can be effected through: instructional salaries that are paid to hire exemplary teachers; resources invested in transportation to move the child safely to school; investment in materials and textbooks; adequate maintenance services to provide a well lit and ventilated classroom; and even resources spent on upgrading and training the professionals working with the financial information system to ensure purchases can be made in a timely manner and resources are allocated appropriately. In summary, the meshing of all the resources in the budget is seen as impacting the performance of our students.

The school system will continue to develop performance measures. Ultimately, the intent is to provide more measures on the program level which will assist in matching dollars invested to program results which will assist policy makers, faculty, and staff in developing future budgets.

Several standards, or measures of performance against which yearly results are compared, have been established by MSDE. Standards help to examine critical aspects of instructional programs, help to ensure that all students receive quality instruction, hold educators accountable for quality instruction, and help to guide efforts toward school improvement.

The standards will be addressed in the sections on the Maryland School Assessment and Maryland Functional Testing Program. In January, 2002, President George W. Bush signed into law the landmark *No Child Left Behind (NCLB)* legislation. Under NCLB, states, school systems and schools are held accountable for the learning progress of every student. To meet NCLB requirements, in September 2002, MSDE announced that the Maryland School Assessment (MSA) would replace the Maryland School Performance Assessment Program (MSPAP), the primary measure of educational accountability since 1993. MSA meets the requirements of the federal No Child Left Behind law and produces individual student results. MSA was given the first time in March 2003, in grades 3, 5, 8, and 10 (Reading only). MSA is fully implemented and will assess reading, mathematics, and science in grades 3 through 8 and reading at grade 10. The results are reported prior to the opening of school in the fall of each year. The data contained in the following section represents the most recent data available.

School Match

Harford County Public Schools is listed as one of the school systems in Maryland rated by SchoolMatch¹, an independent nationwide service developed by school experts, to be recognized as a 2012 "What Parents Want" award winning school system. Only 16% of the nation's public school districts have received this recognition. SchoolMatch helps corporate employee's families find schools that match the needs of their children. SchoolMatch has conducted more than 1000 Educational Effectiveness Audits of School Systems throughout the country and

¹ www.schoolmatch.com

assists corporations with site selection studies. SchoolMatch maintains information on every public school system throughout the nation.

This service is offered as an employee benefit by about 600 companies, including Office Depot, Ernst & Young, Hewlett Packard, KPMG Peat Marwick, Nationwide Insurance, and Cinergy Corporation. More than seven million parents accessed *SchoolMatch* services through a variety of website locations nationwide. Harford County Public Schools ranks high as an award winning school system as well as having a high ranking in the number of accredited elementary schools compared with those in other systems.

Student Participation Rate

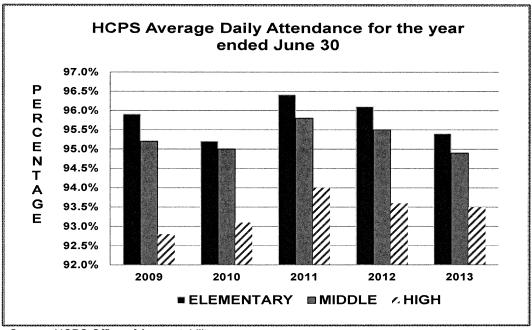

Given the need to attend school on a daily basis and continue through the educational program to graduation or completing a Maryland-approved educational program, Average Daily Attendance and the Dropout Rate become indicators to gauge success.

Average Daily Attendance

Attendance rate is the percentage of students in school for at least half the average school day during the school year. Attendance is a School Progress measure for elementary and middle schools. The Maryland State Department of Education targets an attendance rate of at least 94 percent.

Harford County Public Schools has attained a "Satisfactory" level of attendance in elementary and middle schools. Average Daily Attendance is a rather consistent level of daily participation over the past five years.

HCPS Average Daily Attendance for the year ended June 30											
	2009	2010	2011	2012	2013						
Elementary	95.9%	95.2%	96.4%	96.1%	95.4%						
Middle	95.2%	95.0%	95.8%	95.5%	94.9%						
High	92.8%	93.1%	94.0%	93.6%	93.5%						

Source: HCPS Office of Accountability

Dropout Rate

The Dropout Rate reflects the percentage of students in grades 9 – 12 who withdrew from school before graduation or before completing a Maryland-approved educational program during the July-to-June academic year. Harford County Public Schools dropout rate was 3.16% in 2007 and has consistently remained **less than 3 percent** from 2008 to 2012.

There is a significant relationship between regular attendance, academic achievement, and the completion of school. The state excellent standard is 1.25 percent while the satisfactory standard is 3 percent or less. Harford County Public Schools exceeds the state satisfactory standard. A number of strategies have been implemented to work with students who are not attending school regularly and who are at-risk for dropping out of school:

- Operating dropout prevention programs in six high schools.
- Implementing several elementary and middle schools alternative learning programs to meet the needs of at-risk children in those schools.
- Developed a mentoring program to support students exhibiting problem behavior in school.
- Implemented in-school suspension procedures.
- Continue the alternative education program in a day and twilight program.

Graduation Rate

To meet Adequate Yearly Progress (AYP) in Maryland, all students enrolled in a school must reach or exceed increasingly rigorous performance standards, or Annual Measurable Objectives (AMO), in both reading and math, in addition to one other academic indicator. For high school, this indicator is the graduation rate.

The graduation rate is calculated by dividing the total number of diplomas awarded by the number of students who entered the ninth grade four years earlier. In order to graduate, students must pass each of the Maryland High School Assessments (HSA), achieve a combined minimum score on all HSA tests, participate in the Bridge Plan Program, or receive a waiver.

Harford County Public Schools (HCPS) achieved a graduation rate of **89.52 percent** for the class of 2013. This rate represents a slight increase from the 88.41 percent rate for the class of 2012 and exceeds the 2013 statewide rate of 84.97 percent.

High School Program Completion

The Maryland State Department of Education requires this data be reported by the following classifications:

- University of Maryland The number and percentage of graduates who completed course requirements that would qualify them for admission to the University System of Maryland.
- Career and Technology The number and percentage of graduates who completed an approved Career and Technology Education program.
- Both University and Career/Technology The number and percentage of graduates who met both of the above requirements.

Course requirements for the admissions standards are set by the Board of Regents of the University System of Maryland. Ensuring the acceptability of each local system's courses by the University System of Maryland is the responsibility of the individual school systems.

HCPS High School Diploma students who met requirements For the year ended June 30											
	2009	2010	2011	2012	2013						
Univ. of MD Course Requirements	1,516	1,300	1,434	1,383	1,528						
Career & Tech Program Requirements	347	518	379	336	316						
Both Univ. of MD and Career & Tech	223	450	398	402	436

Future of Graduates

Perhaps one of the comprehensive measures of a school's success is the future the high school graduate chooses to pursue. During a pre-graduation survey, high school seniors are asked to indicate their future plans. The plans are measured as:

- College Planning to attend either a two-year or four-year college.
- Specialized School/Training Planning to attend a specialized school or pursue specialized training.
- Employment Related Planning to enter employment related to their high school program.
- Employment Not Related Planning to enter employment unrelated to their high school program.
- Military Planning to enter the military.
- Employment and School Planning to enter either full-time or part-time employment and attend school.
- Other Other options, not listed.

As of FY 2011, the Maryland State Department of Education Fact Book no longer provides actual numbers or percentages for categories with fewer than 10 students.

Future of HCPS Graduates											
FY2009 FY2010 FY2011 FY2012 FY2013											
College (2 or 4 years)	60.7%	83.2%	82.5%	82.9%	83.9%						
Specialized School/Training	2.8%	5.6%	≤ 5%	≤ 5%	≤ 5%						
Employment (related to school program)	2.9%	1.2%	≤ 5%	≤ 5%	≤ 5%						
Employment (not related to school program)	5.6%	3.5%	≤ 5%	≤ 5%	≤ 5%						
Military	3.3%	3.0%	≤ 5%	≤ 5%	≤ 5%						
Other	3.3%	3.6%	≤ 5%	≤ 5%	≤ 5%

Student Academic Performance

The performance of the school system and individual schools are judged against their own growth from year to year, not against growth in other school systems or in other schools under the Maryland School Performance Program.

The indicators of academic performance that are used to measure the school system include:

- Scholastic Assessment Test (SAT)
- Maryland School Assessment
- High School Assessment

Scholastic Assessment Test (SAT)

The SAT is taken by well over half of all college-bound seniors throughout the nation, score reports and demographic information collected through the test-taking process represent one significant source of information about the nation's college-bound youth over a period of time. It is important to note that the SAT is not a required test. Students decide on their own, or with the support of their parents and teachers/counselors, to participate based on their post-high school plans.

Maryland High School Assessments (HSA)

The Maryland High School Assessments are a series of end-of-course tests. The HSA's consists of four core examinations: Algebra/Data Analysis, Biology, English and Government. All students taking a core learning goals course in one of these subject areas must take the relevant HSA exam. Students must pass the HSA tests to obtain a high school diploma.

Maryland School Assessment (MSA)

The Maryland School Assessments meet the testing requirements of the federal No Child Left Behind (NCLB) Act. The Maryland School Assessments in Reading and Math are administered to students in grades 3 – 8. The Maryland School Assessment in Science is only administered to students in grades 5 and 8.

In order to attain Adequate Yearly Progress (AYP), all students in a school and disaggregated subgroups must achieve state-established proficiency rates, or annual measurable objectives (AMO), for both reading and mathematics. The AMOs reflect increasingly rigorous targets, leading to 100 percent proficiency. The ten distinct student sub-group areas, as defined by NCLB, include students with disabilities, students who are English Language Learners (ELL), students receiving Free and Reduced-priced Meals (FaRMS) and students categorized by seven different race/ethnicity groups. In addition, elementary and middle schools must meet the AMO for attendance rates.

As reported by MSDE, due to the recent Family Educational Rights and Privacy Act (FERPA) changes, new reporting regulations have made it challenging to identify trends in MSA data from 2010 to 2011. Although subgroup accountability for Maryland districts remains at five students, reporting will only occur for groups of 10 students or more. No race trends will be reported by MSDE this year, as categories have changed. In addition, reporting percentages will go only as high as 95 percent or above and as low as five percent or below. Percentages will also be rounded to the nearest whole number. These federal changes have been made in an effort to protect student privacy.

Performance Level Standards

Standards are measures of performance against which yearly results are compared. Standards help to examine critical aspects of instructional programs; help to ensure that all students receive quality instruction; hold educators accountable for quality instruction; and help to guide efforts toward school improvement.

The MSA standards are divided into three levels of achievement:

- Advanced- highly challenging and exemplary level of achievement indication outstanding accomplishment.
- Proficient a realistic and rigorous level of achievement indicating proficiency.
- Basic a level of achievement indicating that more work is needed to attain proficiency.

Alternate Maryland School Assessment (ALT-MSA)

The Alternate Maryland School Assessment is the Maryland assessment in which students with disabilities participate if through the IEP process it has been determined they cannot participate in the Maryland State Assessment even with accommodations. The ALT-MSA assesses and reports student mastery of individually selected indicators and objectives from the reading and mathematics content standards or appropriate access skills. A portfolio is constructed of evidence that documents individual student mastery of the assessed reading and mathematics objectives.

The Alternative Maryland School Assessments in Reading and Math are administered to students in grades three through eight and grade 10. The Alternative Maryland School Assessment in Science is only administered to students in grades five, eight and ten. The statewide performance standards reflecting three levels of achievement; Basic, Proficient, and Advanced are also reported for the ALT-MSA.

Overall Results - Performance Measures for an Educational System

Harford County Public Schools students in grades three through eight continue to meet or exceed Maryland School Assessments (MSA) targets in both reading and mathematics. HCPS students continue to outpace the state in both elementary reading and mathematics and middle school reading and mathematics.

The rate of participation in the Scholastic Aptitude Test (SAT) for 2013 increased slightly from the previous year. Compared to 2012, Harford County test-takers' overall performance improved in each test category; an increase of four points in mathematics (520); an increase of seven points in critical reading (509); and an increase of four points in writing (485).

Harford County mean scale scores for 2013: exceed the state and the nation in mathematics (520 versus 493 and 514, respectively); exceed the state and the nation in critical reading (509 versus 487 and 496, respectively); and, exceed the state and are slightly behind the nation in writing (485 versus 476 and 488 respectively).

Overall Results – Performance Measures for Support Services for an Educational System The school system will continue to expand and refine performance measures by program budget. Charts reflecting performance measures are included within the program narratives of the each budget section. Data reflecting performance measures are by Board of Education Strategic Plan Goals, Master Plan Goals, and No Child Left Behind Goals are identified on the following pages.

Program Goal: Objective

To achieve efficiency in purchasing goods for HCPS. To improve the purchasing process by streamlining small dollar purchases,

expanding user flexibility and increasing efficiency. The card enables employees to make low dollar purchases that are necessary for HCPS operations. Use of the P Card provides faster delivery to the end user and substantially reduces the administrative paperwork involved in purchasing and paying for low dollar items.

In FY00, 15,068 purchase orders were issued. This is a total reduction of 14,112 PO's since FY00.

Strategic Plan Goal #1 To prepare every student for success in postsecondary education and a career.

Master Plan Goal #3 Ensure the effective use of all resources focusing on the areas of technology, fiscal and budgetary

management, and community partnerships.

Actual Actual Actual Actual Actual FY 2009 FY 2010 FY 2011 FY 2012 FY 2013

Other Indicators:

Business Services, Purchasing

Program Goal:

To achieve administrative efficiencies in the procurement business

process by reducing the number of formal sealed bids over \$25,000.

Objective

Sealed bids are required for procurements over \$25,000. Alternative procurements methods, such as piggyback award from a contract award by another public agency, will leverage economies of scale regarding price and at the same time achieve administration efficiencies by reducing the number of formal bids that are much more labor

intensive and require advertising and bonding.

Input Indicators:

Number of Purchase orders 1,006 2,126 1,593 1,513 Dollar value of purchase orders \$49,435,967 \$49,753,210 \$23,415,717 \$33,227,565 \$38,101,477 Number of sealed bids 31 47 47 32 26 305.5 305.5 208 Average # of hours to issue one sealed bid 6.5 hours 201.5 169 Labor cost to issue one sealed bid \$225 per hour \$68,738 \$68,738 \$46,800 \$38,025 \$45,338

Output Indicators:

Labor dollar savings in reduction in formal sealed bids \$11,700 -\$23,400 SO \$21,938 \$8.775 Rebates from Office Depot Contract \$14,193 \$31,294 \$35,403 N/A N/A Other Purchasing Rebates \$17,669 see below not yet available **Total Rebates** see below
