

Single Stream Recycling

WHAT IS SINGLE STREAM RECYCLING

- Recycling process which allows recyclables, including paper to be mixed together in one container.
- Recyclers must continue to separate their recyclables from their refuse.
- Your recyclables will be sorted for you at the Recycle America plant in Elkridge, MD.

WHAT ARE THE BENEFITS

- Saves the School System time & money.
- Makes recycling easier.
- Improves the effectiveness of recycling efforts.
- Ability to recycle more materials.
- Hauling companies can pick up all recycles at one time.
- Saves Landfill space.

HOW ARE THE RECYCLABLES SORTED

- School Community members separate all the recyclables from their refuse
- Every classroom should have a recycling container
- Recyclables are placed in the recycling dumpster on school grounds
