

www.google.com

- Google does not have distracting advertising on its pages.
- Google searches are not case sensitive, so you don't have to worry about capital letters.
- The URL is included in the search results. This way you can check the domain. Common top level domains are: .com, .edu, .gov, .net, .org, .mil
- An excerpt from each web page produced by the search is given.

... with this simple-to-build **house**. It'll give him ... unique personality! These basic **plans** are designed for larger ... Letters that spell your **dog's** name, if desired. ...

www.rewarddog.com/pamper.htm - 5k - [Cached](#) - [Similar pages](#)

- **no need to include “and” between terms.**

- Use quotation marks if you want the words to appear together on a web page.
- You can combine these methods to refine your search.
Example: “dog house” plans
- Refine your search until you get a reasonable number of results. The number of results is noted on the top right section of the Google results page.
- Google has an excellent Image search. Click on “Images” on the Google home page. Type in the topic, and Google will provide thumbnail images of the results. Click on the image and then copy/paste and/or save to a file.
- Google can be used to look up the definition and pronunciation of a word. Type the word in the search box. Click “Google Search”. On the left side of the blue bar (on the results page) you will see: “Searched the web for _____”. Your word is now a link that will take you to *dictionary.com* and a page defining the word.
