

Waste Free Lunch

Did you know about the 5th Grade's waste free lunch project? WASTE FREE LUNCH DAY WILL BE HELD ON FRIDAY, JANUARY 23, 2009. We are having the Waste Free Lunch Day because every day in the cafeteria we are trying to cut down on trash and waste. We have different groups educating the school about items that can be recycled and things that can make an environmentally friendly lunch. One way you can have an environmentally friendly lunch is by helping your child pack only what they will eat for lunch. Another way to have an environmentally friendly lunch is to pack Tupperware for sandwich /snack containers and reusable cloth napkins the third grade will be selling. Last, some tips for packing an environmentally friendly lunch follow. Always cut up fruits and vegetables because children often take one or two bites out of uncut fruit or vegetables and throw the rest away. Another tip is to pack your drinks in a reusable cup or thermos. Lastly, pour your juice box into a reusable cup or thermos. Now you know about the school's waste free lunch project. If you have any questions, please go to the green link at Norrisville's website.
