Harford County Public Schools is focused on excellence in the classroom, school, and management of the school system. This on-going commitment is demonstrated by a variety of measures of achievement and efficiency.

The Board of Education will continue to integrate performance measures within specific program budgets, especially in light of the requirement for a State approved Master Plan as a part of the Bridge to Excellence state funding initiative. Standards are measures of performance against which yearly results are compared. Standards help to:

- examine critical aspects of instructional programs;
- ensure that all students receive quality instruction;
- hold educators accountable for quality instruction; and,
- guide efforts toward school improvement.

Historically, the challenge in designing performance measures for a school system, particularly those measures that are applied to specific programs, has been to develop the link between funding a program and generating an output or outcome. While the community can measure performance of a school system based on easily quantifiable and macro indicators, such as standardized test scores, graduation rates and pass/fail indicators, it often becomes difficult to attribute the resources directed to one program with the effect on a specific measure. Because of the complex relationships that exist among programs and between the programs and resources provided throughout the system, the relationship between program and result is very difficult to determine.

Performance measures for school systems tend to emphasize more macro-level outputs or outcomes. These would be measures that are not easily traceable to the outcome of one particular program. Typically, the aggregate of programs taken together affect an outcome. Student achievement, for example, may be measured by standardized tests, however, these results may represent the culmination of many programs and the impact these resources have on the child. Student achievement can be effected through: instructional salaries that are paid to hire exemplary teachers; resources invested in transportation to move the child safely to school; investment in materials and textbooks; adequate maintenance services to provide a well lit and ventilated classroom; and even resources spent on upgrading and training the professionals working with the financial information system to ensure purchases can be made in a timely manner and resources are allocated appropriately. In summary, the meshing of all the resources in the budget is seen as impacting the performance of our students.

The school system will continue to develop performance measures. Ultimately, the intent is to provide more measures on the program level which will assist in matching dollars invested to program results which will assist policy makers, faculty, and staff in developing future budgets.

The performance measures included in this section have been available to the public on an on-going basis through many sources. The intent is to provide the data to the staff, Board, and public and use the information in guiding the development of program and budget policy as HCPS addresses performance areas of need.
Several standards, or measures of performance against which yearly results are compared, have been established by MSDE. Standards help to examine critical aspects of instructional programs, help to ensure that all students receive quality instruction, hold educators accountable for quality instruction, and help to guide efforts toward school improvement.

Maryland has divided its standards into three areas:

- **Excellent** is a highly challenging and exemplary level of achievement indicating outstanding accomplishment in meeting the needs of students.
- **Satisfactory** is a realistic and rigorous level of achievement indicating proficiency in meeting the needs of students.
- **Not Met** is a level of achievement indicating that more work is needed to attain proficiency in meeting the needs of students.

The standards will be addressed in the sections on the Maryland School Assessment and Maryland Functional Testing Program. In January, 2002, President George W. Bush signed into law the landmark *No Child Left Behind* (NCLB) legislation. Under NCLB, states, school systems and schools are held accountable for the learning progress of every student. To meet NCLB requirements, in September 2002, MSDE announced that the Maryland School Assessment (MSA) would replace the Maryland School Performance Assessment Program (MSPAP), the primary measure of educational accountability since 1993. MSA meets the requirements of the federal No Child Left Behind law and produces individual student results. MSA was given the first time in March 2003, in grades 3, 5, 8, and 10 (Reading only). MSA is fully implemented and will assess reading, mathematics, and science in grades 3 through 8 and reading at grade 10. The results are reported prior to the opening of school in the fall of each year. The data contained in the following section represents the most recent available.

**A Blue Ribbon District**

Harford County Public Schools received a “Blue Ribbon” rating from *Expansion Management* magazine (EM) in their 2007 rankings. Their data uses a base of the 2004-2005 school year. HCPS ranked at the state average for school districts. Expansion Management Magazine has issued a “Blue Ribbon” rating for the school system in the 2007 Education Quotient ranking. EM annually rates over 2,800 school districts around the country on their performance in three areas (indices):

- Graduate outcome;
- Resources invested in the classroom; and,
- Community characteristics.

The Education Quotient (EQ) is composed of the three major indices; it may range from a low of 0 to a high of 100.
SYSTEM PERFORMANCE

The Graduate Outcome (GO) measures the final output of a school district and includes the College Board results and graduation rates. It is the most heavily weighted factor in the EQ. The Resource Index measures a community’s financial commitment to its schools and is a composite of student-teacher ratios, per pupil expenditures, and teachers’ salaries. The final component, the Community Index (CI), measures the economic and educational background of the adult population.

*Maryland average is based on 8 school systems included in study.

Data obtained from Expansion Management Magazine web site, Education Quotient 2007, by Bill King and Michael Keating. Information is available on the web site at www.expansionmagazine.com

The results are used by businesses to evaluate communities in which they are considering locating new facilities. According to Expansion Management magazine, the response to the EQ issue has been phenomenal. The magazine’s readers, usually CEOs or officers of manufacturing and larger service firms, emphasize the importance of education when making relocation decisions for their business and employees.
SchoolMatch\(^1\)

Harford County Public Schools is listed as one of the school systems in Maryland rated by SchoolMatch, an independent nationwide service developed by school experts, to be recognized for meeting the needs of families choosing schools. Only 16% of the nation’s public school districts have received this recognition.

SchoolMatch helps corporate employee’s families find schools that match the needs of their children. SchoolMatch has conducted more than 1000 Educational Effectiveness Audits of School Systems throughout the country and assists corporations with site selection studies. SchoolMatch maintains information on every public school system throughout the nation. SchoolMatch has alliances with or clients of nationally prominent firms such as IBM Business Consulting Services, Office Depot, Park National Bank, Ernst & Young, KPMG Peat Marwick, State Farm Insurance, LexisNexis, Fidelity Investments, United Parcel Service, Ryder International, and the Limited.

Harford County Public Schools ranks high as an award winning school system as well as having a high ranking in the number of accredited elementary schools compared with those in other systems. Currently less than 1/5 of elementary schools nationwide are accredited.

Student Participation Rate

Given the need to attend school on a daily basis and continue through the educational program to graduation or completing a Maryland-approved educational program, Average Daily Attendance and the Dropout Rate become indicators to gauge success. The attendance rate reflects the percentage of students present in school for at least half the average school day during the school year.

Average Daily Attendance

Table 2, Average Daily Attendance indicates a rather consistent level of daily participation over the past six years. Harford County Public Schools have attained a “Satisfactory” level of attendance in elementary and middle schools as Chart 2 shows. The Maryland State Department of Education defines a 94 percent rate as “satisfactory,” a realistic and rigorous level of achievement.

**SYSTEM PERFORMANCE**

**Chart 1**

*Average Daily Attendance for the year ended June 30*

Dropout Rate

The Dropout Rate reflects the percentage of students in grades 9 – 12 who withdrew from school before graduation or before completing a Maryland-approved educational program during the July-to-June academic year. The following chart reflects the rates for the State and Harford County Public Schools.

**Chart 2**

*High School Dropout Rates*

---

3Source: Maryland State Department of Education, 2008 Maryland Report Card
4Source: Maryland State Department of Education, 2008 Maryland Report Card
There is a significant relationship between regular attendance, academic achievement, and the completion of school. The state excellent standard is 1.25 percent while the satisfactory standard is 3 percent or less. Harford County Public Schools exceeds the state satisfactory standard. A number of strategies have been implemented to work with students who are not attending school regularly and who are at-risk for dropping out of school:

- Operation of dropout prevention programs in six high schools;
- Several elementary and middle schools have developed alternative learning programs to meet the needs of at-risk children in those schools;
- A mentoring program has been developed to support students exhibiting problem behavior in school;
- In-school suspension procedures; and,
- Continue the alternative education program in a day and night program.

High School Program Completion

Type of Studies

A review of the program completed by high school graduates in Chart 3 provides an indication of the type of studies completed and the preparation provided for college entry and/or career and technology training. The Maryland State Department of Education requires this data be reported by the following classifications:

- University of Maryland - The number and percentage of graduates who completed course requirements that would qualify them for admission to the University System of Maryland;
- Career and Technology - The number and percentage of graduates who completed an approved Career and Technology Education program; or,
- Both University and Career/Technology - The number and percentage of graduates who met both of the above requirements.

Course requirements for the admissions standards are set by the Board of Regents of the University System of Maryland. Ensuring the acceptability of each local system's courses by the University System of Maryland is the responsibility of the individual school systems.
Another indicator of student performance contained in Chart 4 pertains to the rigor of the coursework taken during a student’s high school career. The Maryland State Department of Education defines “rigorous coursework” as the percentage of graduates who mastered four of the following six performance indicators:

- Two or more credits in the same foreign language with a grade of B or better;
- One or more credits in mathematics courses at a level higher than Algebra II and Geometry with a grade of B or better;

---

SYSTEM PERFORMANCE

- Four credits of science with a grade of B or better;
- Two or more credits of approved advanced technology education with a grade of B or better;
- A score of 1,000 or higher on SAT-1 or a score of 20 or higher on ACT, or both; and,
- A cumulative grade point average of 3.0 or higher on a 4.0 scale.

The data indicates that while 12.3% of the high school graduates meet the requirements for rigorous coursework, more than 82.9 percent of all FY 2007 graduates met the requirements to qualify for University of Maryland admission and/or completed an approved career and technology education program.

Future of Graduates

Perhaps one of the comprehensive measures of a school’s success is the future the high school graduate chooses to pursue. During a pre-graduation survey, high school seniors are asked to indicate their future plans. The plans are measured as:

- College: Planning to attend either a two-year or four-year college;
- Specialized School/Training: Planning to attend a specialized school or pursue specialized training;
- Employment Related: Planning to enter employment related to their high school program;
- Employment Not Related: Planning to enter employment unrelated to their high school program;
- Military: Planning to enter the military;
- Employment and School: Planning to enter either full-time or part-time employment and attend school; and,
- Other: Other options, not listed.

When the College, Employment and School, and Specialized School/Training responses are combined, three-quarters of the graduating class is planning to undertake further education as demonstrated in Chart 5.

*Chart 5 with Table 9*

---

The performance of the school system and individual schools are judged against their own growth from year to year, not against growth in other school systems or in other schools under the Maryland School Performance Program.

The indicators of academic performance that are used to measure the school system include:

- Scholastic Assessment Test (SAT)
- Functional Test (ended 2003)
- High School Assessment
- Maryland School Assessment

**Scholastic Assessment Test**

The Harford County Public Schools’ Class of 2007 that took the Scholastic Assessment Tests (SATs) produced an average Verbal score of 502 – seven points lower than the 2006 results; and a 515 average score on the Math portion of the test – also seven points lower than the 2006 results. Statewide, the Maryland 2007 seniors who took the SATs averaged 500 on the Verbal and 502 in Math; while the nation’s 2007 seniors who opted to take the college entrance assessments averaged 502 on the Verbal and 515 on the Math segments. For the state, the scores decreased by three points for Verbal and seven points for Math. Nationwide seniors also experienced a decrease in scores, one point lower on Verbal and three points lower on Math. For the second year in a row, Harford’s SAT Verbal results represent a slight trend downward. The Math scores had reflected a more significant upward trend except for the most current year which showed a decline in scores. In 2007, Harford’s math scores equal the national average. Charts for the last five years of SAT tests are included in the Statistical Section.

Because the SAT is taken by well over half of all college-bound seniors throughout the nation, score reports and demographic information collected through the test-taking process represent one significant source of information about the nation’s college-bound youth over a period of time. It is important to note that the SAT is not a required test. Students decide on their own, or with the

System Performance

Support of their parents and teachers/counselors, to participate based on their post-high school plans.

**Maryland High School Assessments**

The Maryland High School Assessments are more challenging than the Maryland Functional Tests. The High School Assessments are end-of-course tests that students take as they complete the appropriate high school level course. All students, including middle school students taking high school level courses, must take the High School Assessment after they complete the appropriate course. The courses include English II, Biology, Government, and Algebra. All students receive a score for each test they take. Scores are also reported for the State, school systems, and individual schools. The State requires local school systems to print scores on transcripts for students who entered grade 9 in or after fall 2001. The following charts represent Harford County Public Schools student percent passing as compared to all Maryland State students. More students in Harford County Public Schools have passed the high school assessment tests in each year, except for the HSA Government test in 2005, as compared to all Maryland Students. Charts for the HSA tests are included in the Statistical Section.

**Maryland School Assessment (MSA)**

The Maryland School Assessment requires students in grades 3, 4, 5, 6, 7, 8, to demonstrate what they know about reading and math. Grade 10 students are required to demonstrate proficiency in reading only. Maryland’s End of Course test in Geometry will satisfy NCLB’s requirement for an assessment of mathematics in high school. MSA has replaced the Maryland Performance Assessment Program (MSPAP). The MSA test measures basic as well as higher level skills. Science will be added to the assessment requirement at a later date. The test will produce a score that describes how well a student masters the reading and math content specified in the Maryland Content Standards. Each child will receive a score in each content area that will categorize their performance as basic, proficient, or advanced.

**Performance Level Standards**

Standards are measures of performance against which yearly results are compared. Standards help to examine critical aspects of instructional programs; help to ensure that all students receive quality instruction; hold educators accountable for quality instruction; and help to guide efforts toward school improvement.

Maryland standards are divided into three levels of achievement:

- **Advanced** is a highly challenging and exemplary level of achievement indicating outstanding accomplishment in meeting the needs of students.
- **Proficient** is a realistic and rigorous level of achievement indicating proficiency in meeting the needs of students.
- **Basic** is a level of achievement indicating that more work is needed to attain proficiency in meeting the needs of students.
SYSTEM PERFORMANCE

Student performance is reported in terms of these achievement levels:

Reading:
Basic: Students at this level are unable to adequately read and comprehend grade appropriate literature and informational passages.

Proficient: Students at this level can read grade appropriate text and demonstrate the ability to comprehend literature and informational passages.

Advanced: Students at this level can regularly read above-grade level text and demonstrate the ability to comprehend complex literature and informational passages.

Mathematics:
Basic: Students at this level demonstrate only partial mastery of the skills and concepts defined in the Maryland Mathematics Content Standards.

Proficient: Students at this level demonstrate an understanding of fundamental grade level skills and concepts and can generally solve entry-level problems in mathematics.

Advanced: Students at this level can regularly solve complex problems in mathematics and demonstrate superior ability to reason mathematically.

Geometry:
Basic: Students at this level demonstrate only partial mastery of the skills and concepts defined in the Maryland Geometry Core Learning Goals.

Proficient: Students at this level demonstrate an understanding of fundamental geometry skills and concepts and can generally solve entry-level problems in geometry.

Advanced: Students at this level can regularly solve complex geometry problems and demonstrate superior ability to reason mathematically.

MSA test scores improved overall except for tenth grade reading. Charts for the MSA test scores are included in the Statistical Section.

Alternate Maryland School Assessment (ALT-MSA)
The Alternate Maryland School Assessment is the Maryland assessment in which students with disabilities participate if through the IEP process it has been determined they cannot participate in the Maryland State Assessment even with accommodations. The ALT-MSA assesses and reports student mastery of individually selected indicators and objectives from the reading and mathematics content standards or appropriate access skills. A portfolio is constructed of evidence that documents individual student mastery of the assessed reading and mathematics objectives. In 2003-2004, eligible students participated in the ALT-MSA in grades 3-8, 10 and 11. In 2004-2005 and subsequent years, students have participated in grades 3-8 and 10.
The statewide performance standards reflecting three levels of achievement; Basic, Proficient, and Advanced are also reported for the ALT-MSA. Charts for the results of the ALT-MSA tests are included in the Statistical Section.

**Overall Results – Performance Measures for an Educational System**

Students test scores improved across the system. Some results were mixed with improvements and decreases in scores. Overall, Harford County Public School students have met the adequate yearly progress goal by grade level with the exception of Special Education Students. The adequate yearly progress for special education students was not met in reading in some schools. Identified on the following page are the results of testing for the 2007 school year. The following chart reflects test results for FY 2006 – 2007. Results for FY 2007-2008 Maryland High School Assessment Tests have not yet been released by the Maryland State Department of Education.

Overall Results – Performance Measures for Support Services for an Educational System

Attached on the next pages are performance measures reported by Board Strategic Plan Goal, Master Plan Goal, and ESEA performance indicators. We have stated a program goal, an objective, input indicators, and output indicators. These indicators refer to the Support Services to the educational system whereas other indicators refer to student performance. The school system will continue to expand and refine performance measures by program budgeting and budget managers.
