

# **Growing Home Program**

## **[www.growinghome.info](http://www.growinghome.info)**

Greening begins in your own backyard. The Growing Home program is an innovative way homeowners can help beautify our neighborhoods and increase the tree canopy in our region by planting trees in their yards - and save \$10 on each tree purchased from a participating nursery or garden center. As a public - private partnership between Baltimore and Harford counties,

Baltimore City, local retail nurseries, and homeowners, the Growing Home Campaign promotes tree planting on residential property by providing comprehensive education about selecting and planting great trees for our region and a cash incentive, \$10 savings on each qualifying tree with a retail value of \$25 or more. Make a difference, plant a tree.
