

Mission Statement:

I believe that every student deserves a voice and representation in their education. As a representative as the SMOB, my goal would be to advocate for the needs and interests of all students in Harford County. I want to ensure that every student has access to a meaningful education, resources, and opportunities to thrive. My aim is to create a positive impact on our educational community by promoting inclusivity, equity, and innovation. Every student should have a voice and be represented in their education. My goal as a representative on the Board would be to make sure that all students in Harford County have an opportunity to a high-quality education as well as the materials required. I want to advocate for resources, programs, and opportunities that will help students thrive and succeed, differences aside, and to also know that every student has the chance to reach their full potential! I would want every student to have equal resources and opportunities, regardless of their background or circumstances. I strongly encourage innovative teaching methods and programs that engage students and prepare them for the future. By fostering a supportive and inclusive environment, we can create a positive and enriching educational experience for all students in our community. Another important factor for me is a safe space for minorities like me. Creating a safe space for minorities is crucial for fostering inclusivity and promoting a sense of belonging. Here are a few ways I feel would help our school systems in the future! Education and Awareness: Encourage educational initiatives that raise awareness about different cultures, histories, and experiences. This helps to foster understanding and empathy among all students. Diverse Representation: Promote diverse representation in curriculum materials, textbooks, and classroom resources. This helps to validate the experiences and identities of minority students. Cultural Competency Training: Provide training for teachers and staff on cultural competency, sensitivity, and inclusivity. This helps them better understand and support the needs of minority students. Creating a safe space for minorities requires ongoing commitment and collaboration from all members of the educational community. Let's work together to ensure that every student feels valued, respected, and safe.
